PROFESSIONAL SUMMARY

Lead Angular / UI Developer with 10+ years of experience driving enterprise-scale web applications, specializing in advanced Angular architecture (v16-19) for global financial institutions. Proven track record of technical ownership in UI modernization, Micro Frontend (Module Federation) adoption, and robust state management (NgRx/RxJS). Demonstrated banking domain expertise (Citi CPB), delivering secure, high-performance applications. Adept at cross-functional Agile leadership, mentoring engineering teams, and integrating AI-assisted tools to accelerate delivery and ensure engineering excellence. Currently upskilling in System Design (LLD + HLD), DSA, Applied GenAI, and Product Thinking to grow into senior engineering roles.

TECHNICAL SKILLS

Frontend: Angular 8-16, RxJS, NgRx / state management, HTML5, CSS3, SCSS/Sass, React.js

Languages: TypeScript, JavaScript (ES6+), Java, RESTful Services, SQL, Python

UI Engineering: responsive design, cross-browser compatibility, accessibility, Bootstrap, Angular Material, Prime NG

Architecture: Reusable component libraries, modular UI architecture, lazy loading, shared modules, micro frontends, module federation, custom design systems

Backend/API: REST APIs, HTTP, AJAX, Node.js (Basics), JSON,

Data UI: ag-Grid, ag-Charts, data-intensive dashboards

Quality & Delivery: Jest, Karma and Jasmine unit testing, code review, GitHub Actions, Git, Agile/Scrum, performance optimization, enterprise UI compliance

IDEs & Development Tools: Eclipse, IntelliJ IDEA, Visual Studio Code, PuTTY, Meld Diff, Beyond Compare, SQL Developer.

CI/CD Tools: Maven, Jenkins, SonarQube, TeamCity, Udeploy, Harness, LightSpeed Database: Oracle SQL, MySQL

Cloud & Tools: Git, GitHub, Postman, VS Code, Jira, Confluence, GitHub Copilot- Agents, Claud AI, Devin AI, Cursor AI, Gemini AI, Nexus AI, agent-based AI development tools

PROFESSIONAL EXPERIENCE

Lead Technology / Senior UI Developer | Synechron Technology Pvt. Ltd., Pune | **Aug 2018 - Present**

Client: Citi Private Bank | *Angular 19, TypeScript, RxJS, NgRx, React, Jest, REST APIs, Java, Oracle SQL, GitHub Actions*

Project: CPB Client Onboarding Forms Center and Account Opening: An enterprise banking system for HNI portfolios featuring 24/7 trade management and automated KYC/AML monitoring. The 'Form Center' module digitizes the pre-account opening workflow, enabling bankers to seamlessly manage digital documentation and eSign approvals prior to account activation.

- Delivered responsive UI features and enhanced application stability through structured debugging, while actively contributing to peer code reviews and Agile estimation ceremonies.
- Reduced application load times by 30% utilizing OnPush change detection and bundle analysis.
- Led complex application migrations from AngularJS/Angular 8 to Angular 18, alongside transitioning the core testing framework from Jasmine/Karma to Jest.
- Built reusable components and form validation logic to reduce defects and improve maintainability.
- Integrated REST APIs with robust error handling for reliable and seamless user experience.
- Collaborated with QA, backend, and product teams to deliver sprint goals on time.
- Contributed to bug triage, root-cause analysis, and production/UAT release support.
- Mentored 5 frontend developers and provided technical direction through architectural discussions, Agile coordination, and rigorous code reviews, upskilling the team on Angular 16+, NgRx, PWAs, and Ag-Grid.
- Optimized CI/CD pipelines (Jenkins, TeamCity, Bitbucket) and led the migration of numerous enterprise repositories from TeamCity/UDeploy to LightSpeed Enterprise.
- Integrated secure REST APIs using RxJS, implementing advanced error handling and retry strategies for robust data flow.
- Built data-intensive interfaces using ag-Grid and ag-Charts and integrated secure REST APIs using RxJS with structured error handling and retry strategies.
- Used Jest for frontend unit testing and GitHub Actions for CI workflows; supported delivery quality through code reviews and maintainable engineering standards.
- Championed the adoption of AI-assisted development workflows utilizing GitHub Copilot, Cursor, Devin, and Gemini, driving significant improvements in engineering productivity and code delivery speed.

PROFESSIONAL EXPERIENCE - CONTINUED

Sr. Software Engineer | Java Full Stack Developer | InnoEye Technologies, Indore | **Jan 2017 - Aug 2018**
Client: Rakuten Symphony (Japan) | *Java, MySQL, Angular 2 JavaScript, Bootstrap, Java, HTML5, CSS*

Project: SiteFORGE A cross-platform business automation and field operations platform featuring work-order management, offline mobile processing, role-based access, and real-time executive dashboards.

- Designing and developing front-end code as well as server-side code.
- Deploying and testing the application on Tomcat and Cloud.
- Participated in daily scrum meetings with strong reporting and communication with project managers and developers.
- Contributed ideas for system improvements through regular code reviews and architecture discussions.
- Engaged in requirements analysis and development as per the requirements.
- Supported cross-device and cross-browser compatibility and internationalization for multiple languages.
- Mentored juniors on Git, UI best practices and code standards within the organization.

Software Engineer | Java Full Stack Developer | InnoEye Technologies, Indore | **Feb 2016 - Dec 2016**
Product: HeadStart | *Java, MySQL, AngularJS, Angular 2, JavaScript, jQuery, Bootstrap, HTML5, CSS.*

Project: HeadStart: A Rapid Application Development (RAD) platform that automatically generates complete, multi-tier enterprise web applications directly from data model inputs to accelerate time to-market.

- Implemented the core project head start with all possibilities which requires in every basic generic software application.
- Transformed GUI of generated app from jQuery-Bootstrap to AngularJS-Bootstrap and Angular 2 – Material.
- Made generation of Application configurable based.
- Participated in daily scrum and status meetings with strong reporting and communication with project managers and developers.

Software Engineer | Java Full Stack Developer | InnoEye Technologies, Indore | **Dec 2014 - Feb 2016**

Client: Reliance Jio (Mumbai) | *Java, MySQL, AngularJS, JavaScript, jQuery, Bootstrap, Java, HTML5, CSS*

Project: Site Forge, an automated 4G network lifecycle management system. The platform streamlines end-to-end site installation by managing work-orders, hierarchical engineer task allocations, and role-based verification across key modules (ATP-1A, ATP-11A, NIP Integration) to accelerate organizational operations.

- Designing and developing front-end code as well as server-side code.
- Engaged in requirements analysis and development as per the requirements.
- Participated in daily scrum meetings with regular reporting and coordination with project managers and developers.
- Delivered reusable solutions for complex functionality with minimal code, receiving senior management appreciation.

KEY ACHIEVEMENTS

- Honored with the organization's highest 'Surpass Award' for extraordinary performance and exceeding project goals.
- Received multiple Employ of the Month' awards for consistent, outstanding technical contributions.
- Earned 5 'On the Spot' awards for strategic code optimizations that reduced application load times by 30% and significantly enhanced the user experience.
- Led Agile team sprints to consistently deliver new product features 10% ahead of schedule.

TRAINING/ CERTIFICATIONS

- **Bosscoder Academy - Evolve Batch (Sep 2026 – Present)** | Advanced Engineering Program focused on System Design, DSA, and GenAI for complex architectural problem-solving
- AWS Certified Developer – Associate | Amazon Web Services | Valid Feb 2024 - Feb 2027
- Diploma in Java Technology | NIIT Bhopal.

DOMAINS

- Banking, Financial Services, Telecom.

EDUCATION

B.E. (Electronics & Communication) | Jai Narain College of Technology Bhopal, RGPV University | 78.88% | **8.30** / 10.0

INTERESTS

- **Driving Innovation through AI:** Deeply passionate about the intersection of Generative AI and cloud computing. I thrive on exploring how Large Language Models (LLMs) can be seamlessly integrated into enterprise applications to solve complex business problems and drive user engagement.
- **Continuous Innovation:** Driven by the rapid evolution of the AI landscape and dedicated to continuous upskilling in advanced engineering patterns and AI deployment strategies.
